

In-Office Procedure Consent Form

- () A laryngoscopy is an in-office procedure in which a scope is inserted either through the nasal passage or through a patient's mouth. The scope is used to detect any swelling, redness or lesions. Please be aware that this procedure may be considered an out-patient surgery by your insurance and be billed as such.
 - 31575 or 31231

- () An allergy test is an in-office procedure in which the staff uses 6 individual plastic applicators that are applied on the patient's arms. The patient will be tested for 48 different items.
 - 95024 or 477.8

- () A fine needle biopsy is an in-office procedure in which we numb a patient's affected area and remove a sample by a needle. The sample is then sent out to a lab to be tested.
 - 10021

- () A hearing test is an in-office procedure with the audiologist. A patient's hearing is evaluated.
 - 92557
 - 92567 Tymp (an examination used to test the condition of the middle ear and the mobility of the eardrum.)

- () Mastoid Debridement is an in-office procedure in which foreign matter and dead tissue is removed. Please be aware that this procedure may be considered an outpatient surgery by your insurance and be billed as such.
 - 69220

Please be advised that we have provided all procedure codes to the patient to prevent any unexpected charges. It is the patient's choice to check procedure coverage with their insurance before being treated. I understand that I am responsible for any and all charges my insurance does not cover.
